

June 27, 2024

Mission Solar Energy LLC (“Mission Solar”) has reviewed the Residential Clean Energy Credit requirements under Internal Revenue Code §25D. Because solar modules produced by Mission Solar (the “Modules”) use solar energy to generate electricity, it is our understanding the Modules qualify as “solar electric property” under §25D(d)(2) of the Residential Clean Energy Credit when installed in a dwelling unit located in the United States that is used as a residence by the taxpayer.

Mission Solar manufactures and certifies its Module-types including, but not limited to, model numbers SR8T, SR8K, SX5K, SX5T, SQ5T, SQ5K, SQ8T, TS60, SQ8K, SX9Z, SX6Z, SX6W, SQ9S, SR9S, HT0B, and SX9R.

A taxpayer claiming any tax credit should consult a tax professional with any questions. Mission Solar is not a tax advisor, nor is Mission Solar providing any tax or legal advice. Mission Solar is not responsible or liable for any taxpayer’s ability to qualify for or receive any tax credit.

Under penalties of perjury, I declare that I have examined this certification statement, and to the best of my knowledge and belief, the facts presented are true, correct, and complete.

A handwritten signature in black ink, appearing to read "Lance Wilson", is written above a horizontal line.
